PROFILE SUMMARY

MSc candidate in Data Science & AI with 6+ years of experience in data management and business intelligence. Strong foundation in Python, SQL, ETL workflows, data modeling, and statistical analysis. Experienced in building enterprise dashboards, automating reporting pipelines, and supporting analytical decision-making. Passionate about data engineering, machine learning, and scalable AI solutions in enterprise environments.

EDUCATION

University of Sri Jayewardenepura

2025 - Present

- MSc in Data Science & Artificial Intelligence (Reading)

Kingston University

2022 - 2023

- BSc (Hons) Computer Science in Software Engineering

Study World Lanka Campus (Pearson)

2018 - 2021

- BTEC HND in Computing with Grade Merit

WORK EXPERIENCE

Business Intelligence Analyst | Legacy Health LLC

2024 - PRESENT

- Designed and maintained data transformation workflows to process enterprise datasets for reporting.
- Built interactive dashboards using Power BI to track KPIs and operational performance.
- Automated repetitive data preparation tasks using VBA, improving reporting efficiency.
- Ensured data integrity through validation, cleansing, and structured modeling.
- Collaborated with cross-functional teams in delivering analytics solutions.

Data Research Analyst | TechHome Technologies

2018 - 2024

- Managed and maintained large master datasets ensuring high data quality standards.
- Performed data cleaning, validation, and quality assurance using MatchMaker tool.
- Processed confidential datasets in compliance with strict data governance policies.
- Supported analytical reporting teams by preparing structured and validated datasets.

Office Assistant | Unicef Agencie

2017 - 2018

- Install, configure, and maintain computer systems, software and peripherals
- Keeping records of configuration changes

ACADEMIC PROJECTS

- Classical AI Planning using PDDL | University of Sri Jayewardenepura

2025

 - Modeled a deterministic planning problem using Planning Domain Definition Language (PDDL).
 - Defined domain predicates, actions, preconditions, and effects for agent-based task planning.
 - Designed state-space representations and goal conditions.
 - Implemented planning problem in a standard planner environment.
- Intelligent Product Purchase Prediction | University of Sri Jayewardenepura

2025

 - Developed a machine learning model to predict customer purchase behavior.
 - Performed feature engineering and data preprocessing using Python (Pandas, NumPy, Matplotlib).
 - Implemented classification algorithms (e.g., Logistic Regression / Random Forest).
 - Evaluated model performance using accuracy, precision, recall, and ROC-AUC.
- Android Student Management System with ML Kit | Kingston University

2023

 - Developed Android application integrating Google ML Kit.
 - Implemented machine learning-based features for intelligent data processing.
 - Designed backend data handling and database integration.

SKILLS

Programming & Scripting	Data Engineering	Machine Learning
- Python - SQL - Java - R - VBA	- ETL/ELT processes - Data cleaning & transformation - Data modeling - Structured & semi-structured data handling	- Regression, Classification, Clustering - Model evaluation & cross-validation - Feature engineering - Statistical analysis

LANGUAGES

- English
- Tamil
- Sinhala

ACHIEVEMENTS

- Badminton Runner Up - Legacy Sports Day (2025)
- Badminton Runner Up - Legacy Sports Day (2024)
- Participated in ROBOFEST (2016) - SLIIT
- Olympiad Mathematics 2 levels (2011)
